DREAM RING GÖTTERDÄMMERUNG

CD 1

An error was discovered in the opening passage which has now been corrected. There was an "Heil" missing in the Dawn Duet, and a small pitch lurch at track 10, which have also been corrected (12 March 2016). In the process, the sonics throughout have been slightly improved.

CD 2

We regret the fact that some pitch variances got by in the tumult of finally producing the *Ring* drama restorations. As you likely know, pitch lapses can be very difficult to ascertain in old broadcast recordings because they often occur gradually. However, after careful listening and comparison, the sound engineer (Richard Caniell) has made corrections on *Götterdämmerung* CD-2. We are replacing these *gratis* for all purchasers. (4 November 2014).

Sincerely,

The Directors

Please note: The remastered discs have a gold dot below the angel logo to distinguish them from the previous discs.
